

## 6 Langkah tepat pelumasan bearing yang efektif

### LUBRICATION ENABLED MACHINERY RELIABILITY

#### THE "RIGHTS" OF LUBRICATION

Most bearing related failures can be attributed to bad lubrication management. We can prevent up to 50% of premature bearing failures by addressing the 6 R's of Lubrication with our **Easylube®** Complete Lubrication Solution.

### OUR PROFESSIONAL LUBRICATION SERVICE

The **right lubricant** selection by our Professional lubrication team.

The **right amount** of lubricant is calculated through MQL formulation Software for each bearing in various operation conditions.

The **right re-lubrication interval** calculation is saved to each point.

RFID Patrol Monitoring identifies, monitors and records installation and routine inspections - servicing the **right point**.

The **right people** uses our Guard-watch application software ensuring an effective, accountable lubrication program.

**Easylube** electro-mechanical lubricator ensures constant fresh, clean lubricant at the right amount & the right time - 24/7.
